

VINICIUS SANTOS MEDRADO

DATA & PROCESS AUTOMATION

vinicius@vinmedrado.com · vinmedrado.com · +55 11 93535-0574 · São Paulo, Brazil · linkedin.com/in/viniciusmedrado · github.com/vinmedrado

SUMMARY

Data & Process Automation Analyst with 6+ years of professional experience across the GM Brasil / Stellantis automotive ecosystem (Infosys, Conduent and MSX International). Hands-on background in end-to-end automation, ETL, BI and corporate-system integration. Built an internal Python validation platform integrating Oracle CRM, Intelligent Document Processing and Outlook, cutting operational time by 81% (from ~3 min to ~34 sec per process); also automated Daily NPS from ~13 minutes to ~20 seconds and recovered 4 corporate CX dashboards after a methodology change. Portfolio includes 7 independent systems across software, data, ML and automation.

TECHNICAL SKILLS

Automation Python · Playwright · Selenium · Power Automate · VBA · Background Jobs

Data & ETL SQL · ETL · Power Query · Pandas · Apache Airflow · Data Pipelines

BI & Analytics Power BI · DAX · Rule-Based NLP · Sentiment Analysis · Statistical Correlation · Excel

Backend & APIs FastAPI · REST API · React · Docker · Git

AI & Documents OCR · IDP · Human-in-the-Loop · Scikit-learn · XGBoost · LightGBM · LLMs

Security & Quality AES-256-GCM · Windows DPAPI · pytest · Audit Trails · Telemetry · Failure Recovery

Corporate Systems Oracle CRM On Demand · Outlook · SharePoint · SAP-MM · Entra ID / Graph

EXPERIENCE

Mid-Level Data Analyst

MSX International – Stellantis South America | Jun 2026 – Present

- Automated Daily NPS end-to-end (Focus lookup, history, comparison and PowerPoint), cutting the manual process from ~13 minutes to ~20 seconds.
- Built an end-to-end Python/Selenium automation from Focus to Power BI Dataflow and semantic-model refresh, including SSO, publishing 4 datasets to SharePoint and triggering via Power Automate.
- Rewrote DAX, Power Query and NLP across 4 corporate Customer Experience dashboards broken by a methodology change, restoring dataflows and the semantic model without losing historical trend data.
- Built a proof of concept with Azure/Entra ID, MSAL and Microsoft Graph for authenticated SharePoint file updates.

Freelance Automation Developer

Independent | Feb 2026 – Jun 2026

- Delivered on-demand automations using Google Apps Script, VBA, Mercado Livre API, OCR (Tesseract) and operational/financial spreadsheets for independent clients.

Conduent · General Motors Brasil

São Caetano do Sul, Brazil | Apr 2021 – Feb 2026 · 4 yrs 10 mo

Direct Sales Administrative Analyst | Jun 2023 – Feb 2026

- Built an internal Python platform for end-to-end process-validation automation, integrating Oracle CRM, documents, operational rules and Outlook — cutting operational time by 81%, from ~3 minutes to ~34 seconds per process.
- Implemented an adaptive Intelligent Document Processing (IDP) engine with OCR and Human-in-the-Loop to classify documents, validate tax IDs, dates and validity periods, and reuse analyst-confirmed patterns.
- Automated Oracle CRM On Demand with Playwright, including process lookup, attachment capture and controlled execution of validation steps in the corporate system.
- Designed Outlook integration and background processing with execution queues, attachment handling, history and failure-recovery mechanisms.
- Implemented authentication, access control, audit trails and sensitive-data protection using AES-256-GCM encryption and Windows DPAPI.
- Built contingency mechanisms, caching, performance telemetry and automated tests, reaching 280 passing tests in the current version.

Mid-Level Financial Analyst | Jan 2023 – May 2023

- Automated per-supplier order adjustments via macro, cutting processing time from hours to minutes based on monthly data sent by suppliers.
- Built a tracking spreadsheet giving the team visibility into each supplier's progress.
- Developed a mainframe-navigation macro for packaging lookup and stock analysis.

Junior Financial Analyst | Jul 2022 – Jan 2023

- Built an Access/VBA system to automate invoice receiving: reading invoices from Outlook, SAP-MM entry and PCK/LPN/ASN file generation.
- Implemented failure-detection logic that flagged analysts when an invoice required manual handling, eliminating recurring submission errors.
- Supported implementation of a new triangulation process, removing critical bottlenecks that blocked export operations.
- Produced daily export-invoice reports over 7 months, ensuring 100% daily traceability of issued documents.
- Conducted descriptive analysis of the export process, informing decisions that optimized the operational cycle.

Administrative Assistant | Apr 2021 – Jul 2022

- Processed 5,000+ invoices in one month in SAP and reviewed/released payments and export documents with operational compliance.
- Led training for new hires, including team enablement on a new process implemented at GM's Cragae unit.
- Implemented process improvements that eliminated recurring operational rework, streamlining the team's weekly routine.

Senior Process Operator

Infosys – General Motors Brasil | Apr 2020 – Apr 2021

- Managed documents, issued invoices and built internal control spreadsheets in Excel.
- Coordinated cross-department interface for goods inbound/outbound, ensuring deadline compliance.

INDEPENDENT PROJECTS — 7 SYSTEMS

VinanceOS — Finance, ML & Quantitative Research · <https://vinance-ai.netlify.app>

Python · FastAPI · PostgreSQL · Redis · Celery · React · scikit-learn · XGBoost

Full-stack platform with a Recommendation Engine, Feature Store, ML, causal backtesting, Walk-Forward Validation and paper trading; 629/629 canonical tests passing.

Football Decision Lab — Football MLOps · <https://football-decision-lab.netlify.app>

Python · XGBoost · LightGBM · Scikit-learn

Leakage-safe temporal validation, SHA-256 frozen champion model, automated settlement and human-in-the-loop governance.

Marketplace Seller Platform · <https://vinmedrado.github.io/marketplace-seller-platform/>

FastAPI · Airflow · PostgreSQL · Docker

Mercado Livre OAuth2, raw → staging → mart data pipeline and margin-protected ML pricing.

Applymize — Job Application Automation · <https://applymize.netlify.app>

Python · React · PostgreSQL · Docker · Groq

Six-platform scraping, deduplication, AI ATS scoring and persistent Kanban pipeline.

Lumyra — Event Operations Platform · <https://lumyra-events.netlify.app>

FastAPI · React · PostgreSQL · WebSocket

Event management with RSVP, seating, real-time dashboards and WhatsApp API integration.

Meu Carro Vale — Vehicle Valuation · <https://vinmedrado.github.io/meu-carro-vale/>

FastAPI · React · PostgreSQL

Vehicle valuation combining FIPE data with real market comparables, confidence/source display and exportable PDF report.

FreelanceBot AI — Freelance Prospecting · <https://vinmedrado.github.io/freelance-bot/>

Flask · Playwright · SQLite · Groq · pytest

Three-platform opportunity radar, deterministic Pricing Engine, PDF proposal generation and human review before sending.

EDUCATION

Jun 2025 – Jun 2027 Technology Degree in Data Science — In progress · Cruzeiro do Sul, São Paulo

Jun 2018 – Jun 2020 Technical Diploma in Administration · Senac Santo André
