

VINICIUS SANTOS MEDRADO

DATA & PROCESS AUTOMATION

Vinicius.medrado@outlook.com · +55 11 93535-0574 · São Paulo, Brazil (open to remote) | linkedin.com/in/viniciusmedrado | github.com/vinmedrado

SUMMARY

Data & Process Automation Analyst with 4+ years building automation, ETL and BI systems for the GM Brasil / Stellantis supply chain — cutting operational rework by up to 77%, automating daily NPS reporting from ~13 minutes to under 1, and recovering corporate CX dashboards after a full methodology change. Independent builder of 7 production-grade projects spanning async backends, ML pipelines, and MLOps governance.

SKILLS

Automation: Python, Power Automate, Selenium, VBA | **Data/ETL:** SQL, ETL, Power Query, Pandas, Airflow | **BI:** Power BI, DAX, NLP, Sentiment Analysis | **Backend:** FastAPI, REST APIs, GraphQL, React, Docker, Git | **Databases:** PostgreSQL, SQLite, SQL Server | **ML/AI:** Scikit-learn, XGBoost, LightGBM, LLMs

EXPERIENCE

Mid-Level Data Analyst — MSX International (Stellantis South America)

Jun 2026 – Present

- Automated the Daily NPS process end-to-end (Focus lookup, history, comparison, PowerPoint) — cutting manual work from ~13 minutes to under 1 minute
- End-to-end automation (Python/Selenium) from Focus to Power BI Dataflow and semantic model refresh — extraction, SSO, publishing 4 datasets to SharePoint, and triggering via Power Automate
- Rewrote DAX, Power Query and NLP logic across 4 corporate Customer Experience dashboards broken by a methodology change — dataflows and semantic model recovered without losing historical trend data
- Proof of concept integrating Azure/Entra ID, MSAL and Microsoft Graph to update SharePoint files via an authenticated session

Freelance Automation Developer — Independent

Feb 2026 – Jun 2026

- On-demand automations for independent clients: Google Apps Script, a custom VBA interactive system, Mercado Livre listing automation (developer API), an OCR-based PDF-to-Excel pipeline (Tesseract), and spreadsheets from personal finance to psychology-practice and real-estate management

Data & Process Analyst (progressive roles) — Conduent · General Motors Brasil

Apr 2021 – Feb 2026 · 4 yrs 10 mo

- Built ETL pipelines (Python/SQL/Power Query) and an internal management system — 77% reduction in operational rework
- Automated report/email delivery via Python and VBA — 75% reduction in execution time for 200+ recipients
- Implemented a SQLite cache for +1M zip code lookups, cutting query time from hours to seconds
- Built VBA tools for mainframe status lookups and logistics file standardization; processed +5,000 invoices/month and trained new hires on fiscal receiving

Senior Process Operator — Infosys (client: General Motors Brasil)

Apr 2020 – Apr 2021

INDEPENDENT PROJECTS

Vinance vinance-ai.netlify.app

Personal finance automation platform: market data pipeline, rule-based recommendation engine, and a conversational AI advisor via Groq.

Football Decision Lab football-decision-lab.netlify.app

MLOps platform for sports analytics: temporal validation, frozen champion model (SHA-256), fail-closed guardrails.

Meu Carro Vale meu-carro-vale.netlify.app

Vehicle valuation platform combining FIPE data with real market listings; exportable PDF reports.

FreelanceBot AI vinmedrado.github.io/freelancebot-ai

Freelance-opportunity radar with a deterministic pricing engine (AI never sets price or deadline) and a human-review dashboard before any proposal is sent.

Also built: Lumyra (event-ops SaaS, WebSocket + WhatsApp API), Applymize (AI-powered job application automation), Marketplace Seller Platform (OAuth2 + Airflow) — details and code at github.com/vinmedrado

EDUCATION

B.Sc. Data Science — Cruzeiro do Sul, São Paulo (in progress, expected 2027)

Technical Diploma, Administration — Senac Santo André (2020)
